## AN INTRODUCTION FROM THE HEADTEACHER

The transition from Year 11 to post-16 study marks an important new stage in your school career. You have the opportunity to choose three subjects to study which are closely matched to your interests, and which you will enjoy. You will work increasingly independently, and will be given responsibility to manage your studies within a supportive and strong community.

In addition to your chosen subjects you will have the opportunity to research and develop a project which will demonstrate your depth of thinking. You will develop your knowledge of the wider world through life skills opportunities.

Alongside the challenge of studying to the highest level, we believe it is important for students to develop personally through their post-16 study. In employment we are judged both on quality and on character. We want students to understand what it means to produce work of excellence, but to do so whilst supporting others and developing strong leadership skills. Our Sixth Form students are all involved in working with younger students and the local community as part of their programme of study.

The world beyond year 11 is full of possibilities. There is no single map to identify the best path for all students. I hope this guide will give you useful information to mark a path for your future success, and that you will choose to study at EWS in years 12 and 13.

# SIXTH FORM AT EWS

## A WELCOME FROM THE SIXTH FORM TEAM

Almost every student finds their time in Sixth Form the most enjoyable two years of their time at school. Students are able to concentrate on the subjects that interest them the most with the freedom to plan their own time. Students have more privileges and a much wider range of opportunities.

The Sixth Form experience at EWS presents both challenge and opportunity. We are academically successful with results that are above average, in 2019 (The last year of external examinations) we celebrated record results in every measure. This was further built upon in 2020 and 2021 when Teacher and Centre Grades were implemented. However, our Sixth Form is also a place to broaden knowledge and experience and to develop leadership skills through a wide variety of extra-curricular activities.

Students fulfil their potential academically by taking greater ownership of their learning and progress. Most students study three subjects and complete the Extended Project Qualification. A successful student is an independent learner who manages his or her time effectively and is prepared to put in the additional time and effort to produce the very best outcomes.

Students fulfil their potential personally by making the most of the opportunities available to them, including participating in our internship scheme, volunteering in lower school lessons, raising money for our nominated charities and being part of the school leadership team.

Finally our pastoral care is outstanding. When students leave Sixth Form they are more than prepared for life, be it in higher education or working life. Students invariably leave EWS, after two enjoyable and challenging years, with excellent academic results and the determination and drive to be successful in whatever they choose to do.
